

Coast Dental now a Lumineers® veneers provider

No shots or removal of significant tooth structure make a Lumineers smile makeover easy and affordable at 28 Coast Dental Atlanta locations

ATLANTA, GA (October 23, 2009) – Coast Dental is now offering smile makeovers with Lumineers ultra-thin veneers to patients who want a beautiful, white smile without the pain, shots and drilling of traditional veneers. Lumineers veneers provide a great way to cosmetically correct crooked, gapped, misshapen and dull teeth in just two visits, and create smiles that are attractive and natural-looking. Lumineers veneers have been clinically proven to last 20 years. All 28 Coast Dental Atlanta practices offer competitive prices and savings on Lumineers. For details visit www.CoastDental.com/Lumineers.

Traditional veneers require painful shots and irreversible removal of significant tooth structure, which can permanently damage teeth and cause sensitivity. “Treatment with Lumineers is virtually non-invasive. Coast Dental is excited to provide our patients with this safe option for customizing a smile that they will be proud to show off,” said Adam Diasti, D.D.S., president of Coast Dental.

The ground-breaking LUMITray technology makes completing a smile makeover fast and easy. Lumineers carries a five-year warranty. Schedule a Lumineers consultation at any Coast Dental practice in Atlanta. To locate the nearest practice call 1-888- COAST-44 or visit www.CoastDental.com/FindADentist.

Coast Dental offers patient financing with no annual fee and monthly payments starting as low as \$25 for qualified patients. Coast Dental participates with over 200 dental insurance plans. Patients without dental insurance can save an average of 30 to 60 percent on most dental services by joining Coast Dental's exclusive discount dental plan, Smile Plus®, for a low annual fee. Contact the practice for details.

CoastDental®
